BRITISH MEDICAL ASSOCIATION

ONE HUNDRED AND SEVENTH ANNUAL MEETING, ABERDEEN, JULY, 1939

Patron : HIS MAJESTY THE KING.

President : COLIN D. LINDSAY, M.D., Emeritus Physician, Prince of Wales's Hospital, Plymouth ; Consulting Physician, Royal Eye Infirmary, Plymouth ; Consulting Physician, Tavistock Hospital.

President-Elect : THOMAS FRASER, C.B.E., D.S.O., M.B., Ch.B., D.P.H., D.L., Consulting Physician, Aberdeen Royal Infirmary.

Chairman of Representative Body : H. GUY DAIN, M.B.

Chairman of Council : Sir KAYE LE FLEMING, M.A., M.D.

Treasurer : N. BISHOP HARMAN, LL.D., F.R.C.S.

PROVISIONAL PROGRAMME

The annual Representative Meeting will begin at the Mitchell Hall, Marischal College, on Friday, July 21, at 9.30 a.m., and be continued on the following three weekdays.

The statutory Annual General Meeting will be held at the Mitchell Hall on Tuesday, July 25, at 12.30 p.m., and the adjourned meeting at 8 p.m. at the Capitol Cinema, Union Street.

The Annual Dinner of the Association will take place on Thursday, July 27. The Popular Lecture will be given at the MacRobert Hall, Schoolhill, on Friday, July 28, at 8 p.m.

The Conference of Honorary Secretaries and the Oversea Conference will be held at the Mitchell Hall on Wednesday, July 26.

The Official Religious Service will be held on Tuesday, July 25, at 3.30 p.m.

The Reception Room for registration, at Music Hall, Union Street, will be opened at 2 p.m. on Monday, July 24. The Ladies' Club will be at the Students' Union, Marischal College.

The Annual Exhibition of Surgical Appliances, Foods, Drugs, and Books will be held in Music Hall, Union Street. The official opening will take place on Tuesday, July 25, at 9 a.m. ; it will remain open on July 26, 27, and 28, from 9 a.m. to 6 p.m.

The Pathological Museum will be opened on Tuesday, July 25, at 11 a.m., at the Marischal College.

The clinical and scientific work will be divided among sixteen Sections meeting on Wednesday, Thursday, and Friday, July 26, 27, and 28. We publish below the names of the Sections and the officers appointed to each.

The following Sections will meet on Three Days :

MEDICINE

President : A. GREIG ANDERSON, M.D., F.R.C.P. (Aberdeen).

Vice-Presidents : Professor R. S. AITKEN, M.D., F.R.C.P. (Aberdeen); Professor L. S. P. DAVIDSON, M.D., F.R.C.P.Ed. (Edinburgh) ; W. COTTER HARVEY, M.B., Ch.M. (Sydney) ; R. D. LAWRENCE, M.D., F.R.C.P. (London) ; Professor L. J. WITTS, M.D., F.R.C.P. (Oxford).

Honorary Secretaries : R. J. DUTHIE, M.D., 17 Queen's Road, Aberdeen ; W. EVANS, M.D., F.R.C.P., 19, Cavendish Square, W.1.

OBSTETRICS AND GYNAECOLOGY

President : Professor R. W. JOHNSTONE, C.B.E., M.D., F.R.C.S.Ed., F.C.O.G. (Edinburgh).

Vice-Presidents : Professor DUGALD BAIRD, M.D., F.C.O.G. (Aberdeen) ; FRANK COOK, M.B., F.R.C.S., F.C.O.G. (London) ; G. S. DAVIDSON, M.B., Ch.B., F.R.C.S.Ed. (Aberdeen) ; Professor JAMES HENDRY, M.B.E., M.B., F.R.F.P.S., F.C.O.G. (Glasgow).

Honorary Secretaries: G. P. MILNE, M.B., Ch.B., D.C.O.G., Aberdeen Maternity Hospital, Aberdeen; BEATRICE E. TURNER, M.B., B.S., F.R.C.S.Ed., M.C.O.G., 28, Devonshire Place, W.1.

ORTHOPAEDICS AND FRACTURES

President: ALEXANDER MITCHELL, M.B., Ch.M. (Aberdeen).

Vice-Presidents: ANDREW FOWLER, M.B., Ch.B., F.R.C.S.Ed. (Aberdeen); ALEXANDER MILLER, M.B., Ch.B., F.R.C.S.Ed., F.R.F.P.S. (Glasgow); G. PERKINS, *M.C.*, M.Ch., F.R.C.S. (London).

Honorary Secretaries: A. M. RENNIE, M.B., Ch.B., F.R.C.S., Royal Infirmary, Aberdeen; H. JACKSON BURROWS, M.D., F.R.C.S., 23, Park Crescent, Portland Place, W.1.

SURGERY

President: Professor J. R. LEARMONTH, Ch.M., F.R.C.S.Ed. (Aberdeen).

Vice-Presidents: W. ANDERSON, O.B.E., M.B., F.R.C.S. (Aberdeen); G. GORDON-TAYLOR, O.B.E., M.S., F.R.C.S. (London); NORMAN LAKE, M.D., M.S., F.R.C.S. (London); C. F. MAYNE, O.B.E., M.B., F.R.C.S.Ed. (Plymouth); F. K. SMITH, M.B., Ch.B. (Aberdeen).

Honorary Secretaries: N. J. LOGIE, M.B., Ch.B., F.R.C.S., 4, Albyn Terrace, Aberdeen; JOHN HOSFORD, M.S., F.R.C.S., 58, Harley Street, W.1.

The following Sections will meet on Two Days:

ANATOMY AND ANTHROPOLOGY

President: Professor ALEXANDER LOW, M.D., C.M. (Aberdeen).

Vice-Presidents: Professor R. D. LOCKHART, M.D., Ch.M. (Aberdeen); Professor DAVID WATERSTON, M.D., C.M., F.R.C.S.Ed. (St. Andrews); C. R. WHITTAKER, F.R.C.S.Ed. (Edinburgh).

Honorary Secretaries: G. A. G. MITCHELL, M.B., Ch.M., 62, Balmoral Place, Aberdeen; Professor H. A. HARRIS, M.D., M.R.C.P., School of Anatomy, Cambridge.

DISEASES OF CHILDREN

President: Professor G. B. FLEMING, M.B.E., M.D. (Glasgow).

Vice-Presidents: G. G. BRUCE, M.B., Ch.B., F.R.C.S. (Aberdeen); JOHN CRAIG, M.B., Ch.B., M.R.C.P.Ed. (Aberdeen); K. H. TALLERMAN, *M.C.*, M.D., F.R.C.P. (London).

Honorary Secretaries: I. GORDON, M.B., Ch.B., M.R.C.P., 5, Queen's Gardens, Aberdeen; A. DOYNE BELL, D.M., M.R.C.P., 120, Harley Street, W.1.

MEDICAL SOCIOLOGY (NUTRITION)

President: Sir JOHN BOYD ORR, D.S.O., *M.C.*, M.D., F.R.S. (Aberdeen).

Vice-Presidents: H. E. MAGEE, M.B., B.Ch. (London); J. L. SMYTH (London).

(*Additional Vice-Presidents to be appointed.*)

Honorary Secretaries: G. C. M. M'GONIGLE, M.D., D.P.H., Health Department, 11, Finkle Street, Stockton-on-Tees; JEAN MACI. MACKINTOSH, M.D., D.P.H., City Health Department, 4, Albyn Place, Aberdeen.

NEUROLOGY AND PSYCHIATRY

President: C. P. SYMONDS, D.M., F.R.C.P. (London).

Vice-Presidents: R. DODS BROWN, M.D., F.R.C.P.Ed. (Aberdeen); Professor H. W. B. CAIRNS, D.M., F.R.C.S. (Oxford); G. W. B. JAMES, *M.C.*, M.D., D.P.M. (London).

Honorary Secretaries: W. J. RAITT, M.B., Ch.B., D.P.M., Royal Mental Hospital, Aberdeen; R. N. IRONSIDE, M.B., Ch.B., F.R.C.P., 89, Harley Street, W.1.

OPHTHALMOLOGY

President: W. CLARK SOUTER, M.D., D.O. (Aberdeen).

Vice-Presidents: IDA C. MANN, D.Sc., F.R.C.S., D.O.M.S. (London); H. E. SMITH, M.B., Ch.B. (Aberdeen); O. G. MORGAN, M.Ch., F.R.C.S. (London).

Honorary Secretaries: BEATRIX B. LAW, M.D., D.O., 13, Victoria Street, Aberdeen; FREDERICK RIDLEY, M.B., B.S., F.R.C.S., 12, Wimpole Street, W.1.

OTO-RHINO-LARYNGOLOGY

President: H. BELL TAWSE, M.B., Ch.B., F.R.C.S. (Nottingham).

Vice-Presidents: I. SIMSON HALL, M.B., Ch.B., F.R.C.P.Ed., F.R.C.S.Ed. (Edinburgh); J. D. MCLAGGAN, M.B., Ch.B., F.R.C.S. (London); JOHN H. OTTY, M.B., F.R.C.S. (Aberdeen); R. SCOTT STEVENSON, M.D., F.R.C.S.Ed. (London).

Honorary Secretaries: J. GERRIE, M.B., Ch.B., F.R.C.S.Ed., 2, Queen's Gardens, Aberdeen; R. HOWARTH, M.D., F.R.C.S.Ed., D.L.O., 8, The Crescent, Plymouth.

PATHOLOGY AND BACTERIOLOGY

President: Professor JOHN CRUICKSHANK, M.D. (Aberdeen).

Vice-Presidents: W. E. GYE, M.D., F.R.S. (London); Professor W. D. NEWCOMB, M.D., M.R.C.P. (London); JOHN SMITH, M.D., M.R.C.P. (Aberdeen).

Honorary Secretaries: J. W. HOWIE, M.D., 8, Devonshire Road, Aberdeen; R. J. V. PULVERTAFT, M.D., F.R.C.P., Staplecross, Chislehurst Common, Kent.

PHARMACOLOGY, THERAPEUTICS, AND ANAESTHETICS

President: Professor DAVID CAMPBELL, *M.C.*, M.D., F.R.F.P.S. (Aberdeen).

Vice-Presidents: K. J. FRANKLIN, D.M., M.R.C.P. (Oxford); R. R. MACINTOSH, D.M., F.R.C.S.Ed. (Oxford); J. ROSS MACKENZIE, M.A., D.A. (Aberdeen); Professor J. M. WATT, M.B., Ch.B., M.R.C.P.Ed. (Johannesburg).

Honorary Secretaries: T. N. MORGAN, M.D., 82, Desswood Place, Aberdeen; J. K. HASLER, M.B., B.S., 12, Harman Drive, N.W.2.

PHYSIOLOGY AND BIOCHEMISTRY

President: Professor E. D. ADRIAN, M.D., F.R.C.P., F.R.S. (Cambridge).

Vice-Presidents: Sir JOSEPH BARCROFT, C.B.E., D.Sc., F.R.S. (Cambridge); Professor E. W. H. CRUICKSHANK, M.D., M.R.C.P., F.R.S.Ed. (Aberdeen); A. LYALL, M.D., M.R.C.P. (Aberdeen); Professor G. SPENCER MELVIN, M.D. (London).

Honorary Secretaries: I. A. ANDERSON, M.B., Ch.B., 53, Carlton Place, Aberdeen; J. DOUGLAS ROBERTSON, M.D., M.R.C.P., Courtauld Institute of Biochemistry, Middlesex Hospital Medical School, W.1.

PUBLIC HEALTH AND HYGIENE

President: J. M. MACKINTOSH, M.D., D.P.H. (Edinburgh).

Vice-Presidents: J. FERGUSON, M.B., B.Ch., D.P.H. (Kingston-on-Thames); H. J. RAE, *M.C.*, M.B., Ch.B., D.P.H. (Aberdeen); A. TOPPING, M.D., D.P.H. (London).

Honorary Secretaries: D. W. BERRY, *M.C.*, M.D., D.P.H., Public Health Department, Medical School, Foresterhill, Aberdeen; J. S. LOGAN, M.B., Ch.B., D.P.H., 66, Chadwick Road, Westcliff-on-Sea.

RADIOLOGY

President: RUSSELL J. REYNOLDS, C.B.E., M.B., F.R.C.P., D.M.R.E. (London).

Vice-Presidents: JOHN BLEWETT, M.D., D.M.R.E. (Aberdeen); MIDDLETON CONNON, M.D., C.M. (Aberdeen); J. S. FULTON, M.D., M.R.C.P.Ed., D.R. (Glasgow).

Honorary Secretaries: D. P. LEVACK, M.B., Ch.B., D.M.R.E., 34, Carlton Place, Aberdeen; S. COCHRANE SHANKS, M.D., M.R.C.P., 68, Harley Street, W.1.

The following Section will meet on One Day:

TROPICAL MEDICINE

President: Lieutenant-General W. P. MACARTHUR, C.B., D.S.O., O.B.E., M.D., F.R.C.P. (London).

Vice-Presidents: Lieutenant-Colonel M. M. CRUICKSHANK, M.D., Ch.M., F.R.C.S.Ed. (Madras); Colonel G. F. DAWSON, *M.C.*, M.B., Ch.B. (Edinburgh); GEORGE A. WILLIAMSON, M.D., C.M., D.T.M. (Aberdeen).

Honorary Secretaries: Colonel A. DAWSON, O.B.E., M.B., Ch.B., 15, King's Gate, Aberdeen; F. MURGATROYD, M.D., M.R.C.P., D.T.M., 73, Harley Street, W.1.

Saturday, July 29

8.0 a.m.—Fish Market Excursion.
10.15 a.m.—Excursion.

ACCOMMODATION

Facilities for housing those members who contemplate visiting Aberdeen for the Annual Meeting are adequate. In order to avoid any possible disappointment the Local Executive Committee wishes to remind members of the necessity for making their arrangements as early as possible.

Hotels

A list of suitable hotels is given below. They are both A.A. and non-A.A.; the latter have been inspected by the Ladies Committee. Application for hotel accommodation should be made *direct* to the hotel and not to the Local General Secretary. Should, however, a visiting member have difficulty in obtaining hotel accommodation, application may then be made to the Local General Secretary, British Medical Association Office, 9, Bon-Accord Square, Aberdeen. In applying for hotel accommodation visitors are advised to state that they are members of the British Medical Association.

Private Hospitality

A number of residents have offered private hospitality, and this will be available after provision has been made for official and oversea visitors. Those desiring private hospitality should communicate with the Local General Secretary, stating in detail their requirements.

Boarding Houses and Lodgings

A list of boarding houses and lodgings has been prepared and inspected by the Ladies Committee. Application for accommodation should be made to the Local General Secretary, marking the envelope "L." It should be emphasized that where no garage space is available on the premises adequate facilities are obtainable within a short distance.

Hostels

Accommodation for fifty-eight members is available at the Hilton Hostels, the bed-sitting-rooms being suitable for single members. Application should be made to the Local General Secretary, marking the envelope "H."

Hotels Outside Aberdeen

Hotels outside Aberdeen of which names and particulars are given below are easily accessible by bus or train and are particularly suitable for those who are coming to the meeting by motor. Application for accommodation should be made *direct* to the hotel and not to the Local General Secretary.

CRUISE TO THE NORTHERN CAPITALS

With the approval of the Council of the B.M.A. a special cruise to the Northern Capitals of Europe to follow the Annual Meeting at Aberdeen is being arranged by Pickfords Travel Service. The T.S.S. *Vandyck* will leave Greenock on July 30 (members and their friends may if they wish embark at Liverpool on July 29) for a thirteen-days cruise to Norway, Denmark, and Germany, the ports of call being Christianssand, Arendal, Oslo, Copenhagen, and Hamburg. The charge for the cruise will be seventeen to twenty-six guineas, according to accommodation. The *Vandyck*, states Pickfords Travel Service, provides everything which contributes to the enjoyment, comfort, and convenience of passengers. It has spacious decks, airy cabins (each with its own window or porthole), large, well-furnished public rooms, gymnasium, swimming pools, and an excellent cuisine. Further, and an important factor for the poor sailor, the *Vandyck* is exceptionally steady at sea. Shore excursions, for which, of course, there will be additional charges, will be arranged and full particulars of these will be available from the travel agency.

All who are interested in this cruise are asked to communicate with Pickfords Travel Service, 205 and 206, High Holborn, London, W.C.1, as soon as possible. It is essential if the *Vandyck* is to be reserved solely for the use of members of the B.M.A. and their friends that as many provisional bookings as possible are arranged by February 28. A provisional booking can be made on payment of a deposit of £5.

INTERNATIONAL HOSPITAL ASSOCIATION

A brief review of the work of the International Hospital Association was given by Mr. McAdam Eccles, who is chairman of the United Kingdom Council of that body, at the meeting of the Council of the British Medical Association on January 18. The International Association received a considerable accession of membership from all parts of the world during 1938, and its influence has correspondingly extended. Its work is prominent in the English-speaking countries (that is, the British Empire and the United States), and in Germany, Italy, and France. Its official journal, *Nosokomeion*, had four useful issues in 1938; the frontispiece for the year was a view of Henry VIII's gateway at St. Bartholomew's. Mr. Eccles also described the arrangements for the sixth biennial congress of the association, to be held at Toronto in September next. It has been decided that a party of representatives from Great Britain, Eire, and the Continent should travel together in the C.P.R. liner *Duchess of Atholl*, leaving Liverpool on September 8. Visits have been arranged to take place after the congress to important centres in the United States, concluding with the World's Fair at New York. The return journey can be fixed to suit the convenience of each participant. At the congress itself some twenty-four papers will be read, and in addition there will be reports from no fewer than forty study committees. The president of the association is Dr. Malcolm T. MacEachern, and owing to his gifts of organization and those of his colleagues, Dr. Harvey Agnew, Dr. Caldwell, and Mr. C. T. Flath, the congress bids fair to be an outstanding success and an event of interest to all connected with hospitals in both hemispheres. Further particulars can be obtained from Mr. W. McAdam Eccles, 104, Bryanston Court, London, W.1.

A dinner-dance, promoted jointly by the Manchester Division of the B.M.A. and the Manchester Local Medical and Panel Committee, was held at the Midland Hotel, Manchester, on January 5, Dr. CATHERINE CHISHOLM presiding. Although inclement weather prevented many from attending, well over one hundred persons were present. It was the first function of its kind in the city, and the opportunity was taken of presenting Dr. James Sneddon, who has been honorary secretary of the Local Medical and Panel Committee for the past ten years, with a gold cigarette case and a cheque on behalf of practitioners in Manchester. The presentation was made by Dr. R. G. MCGOWAN, chairman of the Local Medical and Panel Committee. The dinner-dance was very successful, and it is hoped that a similar function will be promoted annually.

HOSPITAL CONTRIBUTORY SCHEMES

CONFERENCE OF REPRESENTATIVES OF MEDICAL STAFFS

A conference of representatives of London voluntary hospital staffs was held at the House of the British Medical Association on January 27 to consider further a scheme prepared by the Advisory Hospital Committee to the Hospital Saving Association, and issued by the Voluntary Hospitals Committee for the County of London, for the upward extension of the income limit of the H.S.A. The conference, which was attended by about eighty representatives, was presided over by Dr. Russell Brain, and Dr. Peter Macdonald, chairman of the Hospitals Comittee of the British Medical Association, was in attendance.

The CHAIRMAN reminded the representatives that the existing scheme of the H.S.A. embodied the following income limits: single man or woman, £4 per week; married couple, £5 per week; married couple with dependants, £6 per week. At the beginning of last year the H.S.A. brought forward a new scheme intended to apply to persons whose incomes were above the limits just mentioned, but below the following limits: single man or woman, £5 per week; married couple, £7 per week; married couple with dependants, £8 per week. The contribution was to be sixpence per week, and co-operating hospitals were to receive a payment for in-patients at the rate of three guineas a week for an adult and two and a half guineas for a child under 16, and for out-patients eight shillings on the same flat-rate basis as for ordinary contributors.

This scheme was considered at a meeting of representatives of London voluntary hospitals in March, 1938, and that meeting asked the British Medical Association to confer with the Voluntary Hospitals Committee and the Advisory Hospital Committee to the H.S.A. and draw up a report for a subsequent conference. That meeting deprecated any extension of the scheme without any real provision being made for the remuneration of medical staffs. In subsequent discussion with the bodies mentioned the question was raised whether schemes for persons having these higher incomes would not be better organized on a provident rather than on a contributory basis. It was learned that the King Edward's Hospital Fund for London was considering the possibility of organizing a provident scheme which would probably include persons with incomes up to approximately £700 a year. It was felt by the hospital representatives, however, that even allowing for this proposed provident scheme there was still room for an extended contributory scheme such as was put forward by the H.S.A. With regard to the remuneration of medical staffs, the proposals put forward by the previous conference, and sponsored by the British Medical Association, had been adopted by the H.S.A. and by the Voluntary Hospitals Committee, and the new scheme included a provision that the services of medical staffs in respect of members of the extended scheme should be recognized by a deduction of not less than 20 per cent. of the moneys received by the hospital. It had also been felt to be undesirable that, as the original scheme provided, persons within these upper income limits should be allowed to attend out-patient departments of hospitals for consultation. The revised scheme recommended to hospital governing bodies that persons within these limits should not be regarded as suitable for out-patient consultations, but should be referred for private consultation, at a modified fee, at the private address of the consultant or elsewhere. Dr. Brain added that the British Medical Association was merely acting as host on this occasion, and the decision to approve or reject the scheme rested entirely with the present meeting.

Dr. PETER MACDONALD added one or two further points to the history of the subject. He said that the meeting with representatives of the H.S.A. and of the Voluntary Hospitals Committee had led to a very frank discussion. These bodies had been asked whether this desired extension could not be worked on provident rather than on contributory lines, and the special points were also put to them regarding the allocation of a percentage in respect of medical services and the non-eligibility of these persons with higher incomes for consultation at out-patient departments. It had been brought to the Association's notice that a provident scheme was being prepared under the auspices of the King Edward's Fund, and a request was made that the contributory scheme proposal should be held in suspense until it was learned what the King Edward's Fund actually proposed to do. Later, however, the Voluntary Hospitals Committee stated that it had been found not practicable to provide for the persons with the income limits given in the extended H.S.A. scheme on provident lines. At the meeting of the Council of the British Medical Association he had proposed that the Council should give a provisional blessing to the H.S.A. scheme on two conditions: the first being that payment in respect of medical services should be placed on an adequate basis, not less than 20 per cent. of the sums received by the hospitals in respect of this scheme; and the second, that the scheme should meet with the approval of the representatives of London voluntary hospitals medical staffs assembled at the present conference. The Council endorsed the scheme with these provisos, and the Hospitals Committee had subsequently approved his action.

In reply to a question, Dr. Macdonald defined the difference between a provident and a contributory scheme. A provident scheme was designed to meet the great bulk of the cost of institutional treatment. It would provide a certain amount per week—five guineas was the usual amount paid in respect of maintenance at a hospital or nursing home. It also provided payment in respect of medical services, including both surgical operations and treatment by physicians inside the institution. The contributory schemes, on the other hand, represented contributions towards the cost of maintenance, and in many hospitals of treatment as well, but they did not aim to cover the whole cost. In a provident scheme there was no element of gratuitous service.

Dr. A. M. H. GRAY, representing the Voluntary Hospitals Committee, pointed out that treatment facilities in London were very much more expensive than in the provinces, and that a provident scheme must be actuarially sound. Under the present H.S.A. scheme the contributions of subscribers went only a part of the way towards the cost, the balance being found by the hospital. Under the provident scheme the contribution had to be of sufficient amount to cover not only the maintenance but treatment. A provident scheme such as was proposed, in which it was desired to pay five guineas a week for maintenance, and an equivalent sum for medical services, would cost the "insurer" at least one shilling a week. Under the present H.S.A. scheme a married man with a family insured not only himself but his dependants for threepence a week, whereas under a provident scheme a married man would have to pay two shillings or more. It was considered whether it would be possible to raise the rate of contribution from threepence to two shillings and sixpence in the case of a man whose income came just within the limits of the new scheme, and it was felt that it was necessary to have some intermediate class.

The CHAIRMAN, in calling for general discussion, said that in order that representatives might speak more freely no names would be mentioned in the report of what took place.

A Representative said that that conference was discussing the case of people with incomes of from £5 to £8 per week. Was it unreasonable to ask a man whose income was represented by the higher figure to pay a shilling or two a week for a provident scheme which would cover him in the event of illness?

Some questions arose as to whether the income limits in the existing H.S.A. scheme were strictly adhered to. Mr. McADAM ECCLES said that it ought to be known that 99½ per cent. of the subscribers to the H.S.A. were industrial workers under national health insurance whose income was known. The CHAIRMAN added that this very important question of the income limit had been considered by the British Medical Association with representatives of the H.S.A. on more than one occasion, and provision was being made that there should be an annual revision of income.

In further discussion the representative of a small voluntary hospital on the outskirts of London said that his medical staff was unanimous in urging the entire rejection of the new H.S.A. scheme. What was proposed was nothing less than that this section of the population should come on to the charity of the medical profession. He could not see why this burden should be placed on voluntary hospitals and their staffs. The people who came under this scheme would quite possibly be of higher income than those who supported the hospitals and made the service possible. The feeling of his staff was that a provident scheme should be instituted under which fees would be paid for medical and surgical service bearing some close relation to the fees at present paid in respect of this class of patient.

Dr. CHARLES HILL (Deputy Secretary) said that if the conference turned down this proposal he hoped that the medical committees of the several hospitals would realize the necessity for advising their committees of management not to accept it. If the scheme were turned down at the present meeting but the committees of management were not persuaded to turn it down, the scheme might be accepted minus the redeeming features—that is to say, the provision with regard to payment of staff, and the exclusion of these persons from consultation in out-patient departments.

The representative of a large London hospital said that he inquired of his house-governor and found that that hospital received about 500 patients a year who came within this extended range of income. The house-governor was very doubtful whether any financial advantage would accrue to the hospital from the scheme, because he said that the inquiry system was such that most of these people were persuaded to pay an amount for maintenance which would at least equal the suggested three guineas a week. Therefore it seemed that if a hospital would receive no more money under such a scheme it was doubtful whether the medical staff could justifiably accept the 20 per cent. allocation of the moneys received.

The following resolution was proposed and seconded from the meeting:

> That this meeting of representatives of medical staffs of London voluntary hospitals declines to approve the extended H.S.A. scheme, and requests all medical committees of such hospitals to urge upon their committees of management not to accept this scheme.

The proposer described the scheme as an "insult" to every consultant in London. He estimated that on the average an individual had not more than one serious illness in a lifetime. The average stay of each patient in hospital was from fourteen to seventeen days. Therefore it was apparently assumed that the life of an individual who earned up to £400 a year was worth only 2½ times three guineas, and that the physicians and surgeons attending him were compensated by a sum representing 2½ times 12s. 7d. The average cost per bed in London was about £4 a week. Why should not people, who averaged only one illness in a lifetime, pay what they were made to pay in America—namely, 10 per cent. of their annual income? The payment of three guineas a week for an adult did not even meet the cost of maintenance.

In reply to questions, Dr. MACDONALD said that the British Medical Association would consider itself bound by any resolution passed at that conference, but the Association had not the influence with the managing bodies of voluntary hospitals such as was possessed by those represented there that day, and it would be for them to take up the matter with their lay committees.

An amendment was moved that the matter be referred back for further consideration, the view of the mover of the amendment being that another scheme might be formulated whereby the payment made by the contributor would be ninepence a week, and certain other safeguarding provisions might be inserted. Dr. MACDONALD did not think that any object would be served by referring the scheme back. The Voluntary Hospitals Committee was unlikely to alter the view it had put forward, which had already been passed on to lay committees. Dr. A. M. H. GRAY, speaking for the Voluntary Hospitals Committee, agreed that not much would be gained by referring the matter back. To convert the proposed scheme into a provident one would involve the provision of private beds, and so far as the larger hospitals in the centre of London were concerned, not one would be found which provided a private bed at a smaller charge than five guineas a week, to which would have to be added payment for medical services.

The amendment was supported from some quarters in the conference, but on a show of hands was decisively lost. The original resolution declining to approve the extended scheme and requesting medical committees to urge their committees of management not to accept it was carried.

The following further resolution was carried unanimously:

> That in the view of representatives of the medical staffs of the voluntary hospitals the appropriate machinery for enabling persons receiving incomes immediately above the present income limits of the H.S.A. to provide their institutional medical service is the provident scheme and not the contributory scheme, and they urge the King's Fund to evolve a scheme which will be available for these persons.

It was further agreed to appoint from the conference a small committee to assist the British Medical Association in consulting with the King's Fund over the question of a provident scheme, and to report back to another conference. The following were elected to serve as the committee: Mr. Lawrence Abel, Mr. E. Carew-Shaw, Mr. Douglas MacLeod, and Dr. Purdon Martin.

HAMPSHIRE MEDICAL ADVISORY COMMITTEE

From time to time references have been made in these columns to the value of medical advisory committees as a medium for co-operation in and consultation on matters of mutual interest to local authorities and the medical profession. A useful example of the type of work which may appropriately be included in the activities of such committees is provided by a recent investigation of maternal deaths undertaken by the Hampshire Medical Advisory Committee. In September, 1937, Dr. H. Leslie Cronk, the county medical officer, invited the committee to investigate a series of maternal deaths occurring in the county and to report thereon with recommendations. A special Obstetric Subcommittee was formed of representatives of the Medical Advisory Committee, co-opted members from the Southern Branch of the British Medical Association, and the Deputy County Medical Officer. The members of the subcommittee were: Sir Richard H. Luce (chairman); Dr. Wilfrid G. Attenborough; Dr. C. A. J. A. Balck Foote; Dr. W. Russell Carling; Dr. O. T. J. C. de H. Clayre; Lieutenant-Colonel J. C. A. Dowse; Dr. W. J. Hart; Mr. Ronald W. Knowlton (hon. secretary). The subcommittee, in the course of seven meetings, reviewed in detail the circumstances of sixty-six maternal deaths. A summary of its work, findings, and recommendations has been circulated by the county medical officer to all medical practitioners in the county.

Insurance Medical Service

Certificates of Incapacity after Confinement

On July 18, 1938, by a remarkable coincidence, two practitioners in different parts of London issued certificates of incapacity to women patients who had recently been confined, and in each case it was certified that the insured person had remained incapable of work up to and including that date by reason of pregnancy. In one case the date of the confinement was June 19, and in the other June 30. The practitioners giving the certificates argued in each case that the cause of incapacity was correctly stated, although it was admitted that the wording of the certificate was incomplete. In the first of the two cases, where the certificate had been given by the locumtenent, it had been suggested in the correspondence, on the practitioner's behalf, that the issue of a certificate in these terms was due to the locumtenent's inexperience—he having been in practice only for a few months—but this was abandoned at the hearing in favour of the argument that the certificate was in fact justified, though incomplete. The responsible practitioner agreed that he personally would probably ascribe the incapacity to anaemia and debility following pregnancy, but it was his opinion that in many post-confinement cases debility was the result of the pregnancy rather than of the actual confinement. The following is an extract from the report of the Medical Service Subcommittee:

"Pregnancy is a well-known and well-understood condition, and it is difficult to understand the attitude of mind of a practitioner who certifies that a woman is rendered incapable of work by reason of pregnancy when she is not, in fact, pregnant. . . . The word 'pregnancy,' used in a medical sense, can have only one meaning: namely, that a woman in respect of whom the term is used is pregnant—that is, is 'with child.' If the woman has already been confined it is obvious to anyone that the condition of pregnancy has passed. . . . To give the highest value to the practitioner's submission—namely, that pregnancy was the original cause of incapacity and therefore the continuing cause—it means that post-confinement incapacity is due to the effects of the pregnancy and not to pregnancy itself. The argument is unconvincing. In any case, in the certificate which was issued it was indicated that incapacity existed by reason of pregnancy, not by reason of the after-effects of pregnancy. It is in this respect that we find that the practitioner, through the act of his locumtenent, failed to comply with the terms of Rule 13 of the Medical Certification Rules.... The locumtenent admitted that when he saw the insured person on July 18, 1938, he knew that her confinement had taken place, and in these circumstances we can only think that he inserted the word 'pregnancy' in a moment of carelessness, and that he would have been well advised to have said so."

In the second case the subcommittee's report points out that the practitioner said that

"when he gave the certificates he was not in any doubt as to the confinement having taken place, that he used the word pregnancy deliberately as, in his opinion, the debilitated condition of the patient was due entirely to the fact that she had been pregnant and confined in 1937, and that in 1938 another pregnancy and confinement had ensued. The incapacity was, in his view, due not to the confinement itself but to the pregnancy repeated after a very short interval. He said that on the certificate dated August 16, 1938, he introduced the word 'confinement' ('pregnancy and confinement') because the insured person said the approved society had raised a difficulty in connexion with the payment of benefit on the previous certificate for pregnancy. He then went on holiday and asked his deputy to issue further certificates as requisite, and the deputy evidently agreed with his view of the case, as was evidenced by the certificates (containing the word 'pregnancy' only) dated September 9 and 23, 1938. . . . The practitioner added that the case was one out of the ordinary, and was in fact the first of this type with which he had come in contact. We asked him as to his practice in these cases, and whether it was usual to certify incapacity as due to pregnancy in those cases in which insured persons under his care continued on the funds after their confinement, and he told us that to the best of his recollection he could not remember having had occasion to issue a similar certificate."

"The practitioner's contention was that as pregnancy was the original cause of incapacity it was in this case the continuing cause. His submission is that the post-confinement incapacity was due to the effects of repeated pregnancies, and not to an existing condition of pregnancy.

"The certificates which a practitioner issues are, generally speaking, intended for submission to approved societies whose officers are lay people, and it is essential in these circumstances that the certificates should be worded in such a manner as not to mislead the persons whose duty it is to examine and deal with them. It appears to us that to the lay mind the word 'pregnancy' implies, and in our opinion can only imply, a pregnant condition, and if that word is used in a certificate to describe a condition which does not in fact exist it renders the certificate misleading if not inaccurate. The argument adduced by the practitioner was very similar to that presented to us in connexion with the previous case, and suggests ingenuity rather than conviction."

In both reports attention is drawn to the express requirement of Rule 13 of the Medical Certification Rules that a practitioner is required to specify the cause of incapacity as precisely as his knowledge of the insured person's condition at the time of examination permits, and it is found that in this respect there was failure to comply with the Medical Certification Rules, and that the practitioner should be warned of the necessity for scrupulous care in connexion with the issuing of certificates of incapacity to insured persons.

INCAPACITATING SICKNESS IN SCOTLAND

According to the report on incapacitating sickness which was issued last week by the Department of Health for Scotland, 75 per cent. of the insured population in Scotland were never incapacitated during the year ended June 30, 1937. It is again emphasized that chronic invalidism among a comparatively small group is responsible for a high percentage of the total days lost through sickness. The Department arranged a sample investigation to ascertain the number of insured persons who suffered from no illness within the year. A deliberate selection was made of six approved societies of diverse type, whose total membership was one-tenth of the Scottish insured population and showed a similar sex ratio to that of the total population. The illnesses recorded by these societies were specially related, so that repeated attacks of sickness within the year for the same person were associated and thus the number of persons ill in relation to the number of illnesses was ascertained. The average result of the six societies shows that, excluding permanent invalidity, 100 periods of incapacity involved eighty-three individuals, the result being probably representative of the Scottish experience as a whole. During the year there were 542,000 periods of incapacity in Scotland, of which 30,000 were in respect of persons ill throughout the year. Thus 420,000 persons (83 per cent. of the remainder) were ill for varying periods of, on an average, short duration. (The average length of illnesses starting and terminating within the year was 22.73 days.) So the rest of the insured population of about 1,788,000 people were never incapacitated during the year. During the year under review 1.7 per cent. were continuously incapacitated, 23.5 per cent. were on one or more occasions unfitted for work, and 74.8 per cent. were never ill. Nevertheless, the total volume of incapacity recorded was 26,673,980 days, or an average of 14.92 days per insured person. This is an increase over the previous year and is in accord with the trend indicated in earlier reports. The severe influenza epidemic at the beginning of 1937 raised the sickness rates generally, but more significant was the effect of the further growth of chronic sickness, the rates for which have been increasing since 1931. The number of persons continuously incapacitated over the year was 30,754, the number of days represented by this figure being 11,225,000. That is to say, 1.7 per

cent. of the insured population continuously ill during the year—one person from each sixty—accounted for two-fifths of the total days lost through sickness. So the bulk total of incapacity conveys perhaps an unduly gloomy picture of the general health of the insured population.

The Department's report for 1937 announced the institution of a clinical inquiry into a series of cases of chronic incapacity; details of the inquiry and news of its progress will be found in the Department's annual reports.

Correspondence

Training in First Aid for A.R.P.

SIR,—From time to time for about ten years I have been lecturing and examining in a country district for the British Red Cross Society. Lectures lasted about an hour, with twenty or thirty minutes' practical instruction. It was taken for granted, and I think rightly, that I taught both parts myself. Examinations consisted of a viva of four questions and some practical work—for example, splinting a fractured tibia. Since the crisis my wife and I have been asked to examine, with this difference: we were told that the practical examination would be conducted by senior V.A.D.s. When we replied that we preferred to do it ourselves no objection was raised, but I was told that the procedure was authorized by the B.R.C.S., and was being followed all over the country. The large number of candidates was given as the reason for this change. Recently I have heard that in some cases the practical instruction has not been given by the doctor lecturing but by members of the B.R.C.S.

At one time training in first aid was a purely domestic matter of the B.R.C.S., and one was led to believe that they did not wish too high a standard of knowledge to be set. It was probable that the majority of those examined would never be called upon to do any first aid unless they joined a detachment, in which case further training and competitions were open to them. Since the crisis the matter has assumed a different aspect. Sir John Anderson has stated that the training of first-aid workers has been entrusted to the B.R.C.S. and the St. John Ambulance Brigade (I am not acquainted with the procedure adopted by the latter organization). First aid, from being a more or less interesting hobby, has become a matter of national importance. First-aid workers may be called upon to do serious and responsible work, and yet the B.R.C.S. has chosen this moment to lower the standard of their examinations. Candidates are being taught and examined by amateurs who may or may not be competent; in some cases I know that they are not.

Recently my wife and I examined (viva voce and practical) about fifty candidates. Of these a few would be really useful; some were quite hopeless, and the majority might be useful with further training. But is any further training coming? We have not heard of any, although we have called attention to the necessity for it. If the attitude is to be "I have a certificate and so need do no more about it," then I suggest that most of those recently trained will, without further training, be not only useless but a source of danger.—I am, etc.,

Buxhall, January 15. MAURICE MOTTRAM.

A chiropody group council has been set up by the Board of Registration of Medical Auxiliaries to act as the qualifying body for chiropodists requiring admission to the National Register of Medical Auxiliary Services. This arises out of the recommendations of the Annual Representative Meeting of the British Medical Association of July last, according a certain degree of recognition to chiropodists. At present two bodies have been investigated and approved by the Board—the Incorporated Society of Chiropodists and the British Association of Chiropodists, which are represented on the group council. The investigation of other chiropodial bodies which have applied for recognition is proceeding.

Melbourne Chess Cup Competition

Entrants are requested for the Melbourne Chess Cup Competition, which is held annually on the lines of the Treasurer's golf trophy. The competition is conducted on the "knock-out" method, and any member wishing to enter should send his name as soon as possible to the Secretary, B.M.A. House, Tavistock Square, London, W.C.1. Mr. W. McAdam Eccles, 104, Bryanston Court, London, W.1, is acting as honorary secretary in the Metropolitan Counties Branch area, and would be glad to receive names not later than February 10.

The Rules and Regulations are as follows:

1. The Melbourne Chess Cup shall be the property of the British Medical Association.

2. It shall be competed for annually by members of the Association.

3. It shall be held for the year in which it is won by the winner.

4. The first round of the competition must be played off by March 31, 1939, and the winners of each contest must immediately notify the Secretary of the Association. Further instructions will be issued to them individually. The final (and if sufficient entries are received the semi-final) will be played off at Aberdeen during the Annual Meeting of the Association. The earlier rounds may be played by correspondence if so desired.

5. All rounds except the semi-final and the final must be played off by July 1, 1939. All games not played by then must be scratched.

6. The final shall be decided by the best of three games.

7. The Cup shall be presented to the winner on the same occasion as the golf trophies are presented.

All inquiries in connexion with the competition should be addressed to the Secretary of the Association.

Scholarships and Grants in Aid of Scientific Research

Scholarships

The Council of the British Medical Association is prepared to receive applications for Research Scholarships as follows: an Ernest Hart Memorial Scholarship of the value of £200 per annum, a Walter Dixon Scholarship of the value of £200 per annum, and three Research Scholarships each of the value of £150 per annum. These scholarships are given to candidates whom the Science Committee of the Association recommends as qualified to undertake research in any subject (including State Medicine) relating to the causation, prevention, or treatment of disease. Preference will be given, other things being equal, to members of the medical profession. Each scholarship is tenable for one year from October 1, 1939. A scholar may be reappointed for not more than two additional

terms. A scholar is not necessarily required to devote the whole of his or her time to the work of research, but may hold a junior appointment at a university, medical school, or hospital, provided the duties of such appointment do not interfere with his or her work as a scholar.

Grants

The Council of the British Medical Association is also prepared to receive applications for grants for the assistance of research in the causation, treatment, or prevention of disease. Preference will be given, other things being equal, to members of the medical profession and to applicants who propose as subjects of investigation problems directly related to practical medicine.

Conditions of Award: Applications

Applications for scholarships and grants must be made not later than Saturday, May 6, 1939, on the prescribed form, a copy of which will be supplied on application to the Secretary of the Association, B.M.A. House, Tavistock Square, London, W.C.1. Applicants are required to furnish the names of three referees who are competent to speak as to their capacity for the research contemplated.

Branch and Division Meetings to be Held

BERKS, BUCKS, AND OXFORD BRANCH: READING DIVISION.—At Royal Berkshire Hospital, Reading, Wednesday, February 8, 8.30 p.m. Dr. H. Yellowlees: "The Psychological Difficulties of Adolescence."

BIRMINGHAM BRANCH: COVENTRY DIVISION.—Tuesday, February 7. Dr. Leslie C. Hill (Bath): "Medical Hydrology."

EAST YORKSHIRE BRANCH.—At Quern House, Park Street, Hull, Wednesday, February 8, 8.30 p.m. Dr. Geoffrey Holmes (Harrogate): "The Treatment of Chronic Rheumatism."

GLASGOW AND WEST OF SCOTLAND BRANCH: LANARKSHIRE DIVISION.—At Institute of Engineers and Shipbuilders, 39, Elmbank Crescent, Glasgow, Wednesday, February 8, 8 p.m. B.M.A. Lecture by Mr. Philip Hamill: "Specific and Non-specific Therapy in General Medicine."

GLOUCESTERSHIRE BRANCH.—At Cheltenham, Thursday, February 9. Dr. Anderson and Mr. Barker: "Vertigo."

HERTFORDSHIRE BRANCH: ST. ALBANS DIVISION.—At Hill End Hospital and Clinic, St. Albans, Wednesday, February 8, 8.30 p.m. Mr. Cecil P. G. Wakeley: "The Treatment of Thyrotoxicosis."

LANCASHIRE AND CHESHIRE BRANCH: BLACKPOOL DIVISION.—At Hotel Metropole, Blackpool, Wednesday, February 8. Mr. W. J. Eastwood (Liverpool): "Orthopaedic Treatment in General Practice." Preceded by dinner at 7.15 p.m.

METROPOLITAN COUNTIES BRANCH: CITY DIVISION.—At Metropolitan Hospital, Kingsland Road, E., Tuesday, February 7, 9.30 p.m. Mr. Cecil P. G. Wakeley: "The Problem of Gall-stones."

METROPOLITAN COUNTIES BRANCH: HAMPSTEAD DIVISION.—At Hampstead General Hospital, Thursday, February 9, 8.30 p.m. Joint meeting with the Northern Division of the British Dental Association. Discussion: "Nutrition in Relation to Dentition."

METROPOLITAN COUNTIES BRANCH: KENSINGTON DIVISION.—At British Postgraduate Medical School, Ducane Road, W., Wednesday, February 8, 9 p.m. Meeting to consider the emergency organization of the medical profession. All members of the profession are invited to attend.

METROPOLITAN COUNTIES BRANCH: ST. PANCRAS DIVISION.—At B.M.A. House, Tavistock Square, W.C., Tuesday, February 7, 9 p.m. Special meeting to appoint a Local Emergency Committee, and a representative to attend the Conference of Representatives of Local Emergency Committees, Members of the Central Emergency Committee, and the Council of the British Medical Association, on February 15.

METROPOLITAN COUNTIES BRANCH: WANDSWORTH DIVISION.—At Bolingbroke Hospital, Wandsworth Common, S.W., Tuesday, February 7, 8.45 p.m. Dr. L. E. H. Whitby: "The Diagnosis and Treatment of Blood Diseases in General Practice."

METROPOLITAN COUNTIES BRANCH: WESTMINSTER AND HOLBORN DIVISION.—At Westminster City Hall, Charing Cross Road, W.C., Friday, February 10, 8.15 p.m. Air raid precautions lecture by General Barrow, Home Office Instructor.

METROPOLITAN COUNTIES BRANCH: WOOLWICH DIVISION.—At War Memorial Hospital, Woolwich, S.E., Tuesday, February 7, 8.50 p.m. Mr. M. P. Reddington: "Treatment of the Climacteric."

NORTH OF ENGLAND BRANCH: HEXHAM DIVISION.—At Abbey Hotel, Hexham, Saturday, February 4, 8.30 p.m. Elections to Local Emergency Committee, etc.

NORTH OF ENGLAND BRANCH: SUNDERLAND DIVISION.—At Royal Infirmary, Sunderland, Thursday, February 9. Afternoon address by Dr. Alfred Cox: "Some Reflections on the Proposals for a General Medical Service for the Nation." Annual medical dinner at Palatine Hotel, Sunderland.

SHROPSHIRE AND MID-WALES BRANCH.—At Salop Royal Infirmary, Tuesday, February 7, 3.15 p.m. Mr. H. Morriston Davies: "Recent Progress in the Surgical Treatment of the Diseases of the Lung and Pleura."

SOUTH WALES AND MONMOUTHSHIRE BRANCH.—At Swansea General Hospital, Thursday, February 9, 3.45 p.m. Dr. David R. Lewis: "The Enigma of Gastroduodenal Ulceration." Dr. W. Esmond Rees: "Some Observations on Epilepsy." Mr. C. P. Robinson: "Headache of Sinus Origin."
